Subject: Ala Wai Watershed and DTS participation in the stakeholder meetings?

Hi Faith and Reid - Lindsey gave me your contact info from the meeting you had on the rapid transit plan. I'm the project manager for the Ala Wai Watershed Study. Ala Wai Watershed covers Makiki, Manoa, Palolo, and the lowlands of Ala Moana, Ala Wai, Moiliili, Waikiki and Kapahulu areas. The Ala Wai Watershed study is co-sponsored by DLNR Engineering Services and C&C Environmental Services. The study has the purpose of identifying measures to address several objectives including flood risk management, ecosystem restoration, water quality, water supply, coastal issues, public involvement and infrastructure maintenance. For more information you can go to our website at www.alawaiwatershed.com

At the Waikiki Neighborhood Board meeting last month, the Board members reminded me that there rapid transit will likely go along the Ala Wai Canal and then also through our study area to the University. Especially along the Ala Wai Canal, we may be currently proposing flood risk management measures in some of the same locations as the rapid transit. I'd like to invite you to our Stakeholder meeting (next meeting to occur on Friday 6 2008 at 9:00am at the CH2M Hill offices (1132 Bishop Street - Lisa and Paul on the cc line are working with us at CH2M Hill). It would be very useful for us to coordinate our plans so that we can make sure either plan doesn't accidentally impact or interfere with potential benefits or requirements of the other plan.

If you are able to attend that would be wonderful. If not - I can catch you up to speed on the project status, objectives, schedule, etc. so that we can stay in coordination. If there is a better person for me to coordinate with in your Department, please point me in the right direction.

Thanks a lot and Happy Holidays.!
Cindy
