Slater sent a letter during scoping that was at least 8 pages long that he claims was never responded to. If there is a response to this letter, please send a copy to me.

Thanks.
1. I'll review
2. NEPA Scoping Package isn't up there yet. I'll make sure it and the AA are easier to find.
3. We are working on summary of comments from council hearings. There are about 3,000 pages of them. We provided response letters to all comments received during AA scoping. The AA scoping document has been on the website for 6 months or more.

1. Please see changes attached.

2. I checked the project Web site, and the AA document and the NEPA scoping information packet should be more readily accessible. I shouldn't have to search and find them in a long list muddled by numerous other documents with similar names that may or may not be what I am looking for.

3. Slater visited FTA this week. He is still looking for responses to his comments. I hope that you are still committed to developing a comments/responses document for the AA as we discussed when we met with Toru here in DC. I can't find it on the Web site, which is where I would expect it to be posted.

Joe,

Here is a proposed final version. I have addressed your most recent comments on discussion of technologies. As you will notice, we have changed the definition of the first project to match that selected by city council (to follow the Salt Lake Alignment). Also, Don Emerson suggested a couple of revisions to Section II that I incorporated. Unless you have further

concerns, we will submit this officially next week.

Your review and comments are much appreciated,
Lawrence

Joe,

Thank you for meeting with me last week. I appreciated getting to know who you are and your ideas on this project.

Here is the draft Notice of Intent that you discussed with Toru and Mark this morning. I have put preliminary dates in the NOI that would correspond to an issuance around February 28/March 1 to provide a 30 day comment period. Dates may be adjusted of course. Please let me know if there is anything else that I can do.
