Attachments: EW DEIS Notice of Intent_clean Final.doc; FTA Sample Letter of Invitation w_Attach Final.doc

Faith:

Here is the NEW invitation letter for you to complete a draft of. I know that Region 9 has asked for the clarification issues that you added in your last drafts to us. One is for FHWA and one for SDOT. If you can draft 2 new letters for me following the above format, we can go from there.

I'm assuming that since you will be issuing a new NOI that we will need to discuss the use of that sentence in the first paragraph. Please note in that sentence that DTS will need to develop a coordination plan in accordance with the new Section 6002 rules. I attempted on the phone today to get more info about this or a sample from Jim Barr, but apparently nothing is yet available. I will continue to dig around for you. Just wanted to make you aware of these requirements. Sorry this process has taken so long, but at least we will have the letters correct when they are sent. I'm assuming we will be sending more when the LPA is decided to SHPO at least.

Talk to you tomorrow. Thanks.

DT

Darin:

Please perform two intranet related functions on the TPE-30 webpage.
Go to National Environmental Policy Act (NEPA) and the subpart Class I Environmental Impact Statement table.
1. Remove the existing Sample Notice of Intent (NOI) under "Scoping" and replace it with the new Sample Notice of Intent (NOI) attached.
2. Under the same "Scoping" category, insert the attached FTA Sample Letter of Invitation.
Any questions please call.

Thanks;

Jim
