Yeah, it should be fine. As you say, change the glass and eliminate the pantograph.
I don't think anybody has talked about what the "paintjob" on the trains should be yet...

I am confused by the emails, you have a train you want to use but then you are worried about copy rights, but you don't know who owns it. This is silly.
We are using the train on your project which you are paying us to animate for you. We won't distribute your train so there is not a copy right infringement.

I thought you had a train that represented the actual train you want to use, made by the company who makes the real thing.

If it does not matter.
Can we use this one until you provide an alternative? we will drop the yellow windows for tinted or clear and drop the aerial.

Sorry Janna I don't, I guess this was purchased a while ago and I'm not the one who got it. I can check with our Denver team to see if anyone knows.

Thanks,
Jay

Thanks.

Jay: do you have that 3D model vendor information handy? We have the model and animations set up, and we need to get the train dropped in.

Thanks,
janna

Here's what we have.
Lawrence, which one do you intend to use?

In the meantime, can either of you provide a 2D picture of the train, just so that we can get an idea of what we're dealing with?

Janna

Hi Janna,
Unfortunately I can't give the train model, this is something that we have purchased from a 3D models vendor and I am not authorized to give it away or re-sell it.

Thanks,
Jay

Jay, we didn't hear back from you regarding the train model. Lawrence indicated that one had been selected and that you could send us a copy. Let me know if it's large enough to necessitate being ftp'd; otherwise, just email it.

Thanks,
Janna

Hi Janna,
I just uploaded the models we have created so far for the project, they're all in a zip file. Let me know if you need anything else. Thanks, Jay

Jay, here is the login information you need to ftp the 3D models to us. Let me know if you have any problems.

ftp://66.91.141.6/

User: pbworld
Pswd: pb+2=4

Also, let me know when the textured/detailed models are available.

Thanks,
Janna H. Cole
