Jim,

Thank you for taking the time to meet with us yesterday. With your help we better understand the FAA regulations governing runway clearance and the steps we must take to get FAA concurrence. As mentioned in our meeting, attached is a draft letter for your consideration to be sent to Toru Hamayasu (RTD) summarizing our meeting. This letter is important to our FTA environmental process as it clarifies FAA runway clearance requirements that unfortunately were misinterpreted in comments provided by a FTA.

I hope I captured the intent of your comments, but feel free to edit. If you have any questions please do not hesitate to contact me.

Again thanks for your help,

Jim Dunn
