Do you think we should suggest a conference call among FTA staffs, the City, and the consultants (others, maybe FAA staff or officials?) after everybody has had an opportunity to look over the material, Liz?

Subject: FAA Submittal Information

Hello Faith,

Attached is information that FTA received from FAA with their review of transit alignment options at the Honolulu International Airport. FAA has requested that this information be incorporated into our NEPA documentation for the project.

Please let us know if you have questions.

Liz
