Mr. Mike Uechi
(No address or e-mail provided)

Dear Mr. Uechi:

Subject: Honolulu High-Capacity Transit Corridor Project
Comments Received on the Draft Environmental Impact Statement

The U.S. Department of Transportation Federal Transit Administration (FTA) and the City and County of Honolulu Department of Transportation Services (DTS) issued a Draft Environmental Impact Statement (EIS) for the Honolulu High-Capacity Transit Corridor Project. This letter is in response to substantive comments received on the Draft EIS during the comment period, which concluded on February 6, 2009. The Final EIS identifies the Airport Alternative as the Project and is the focus of this document. The selection of the Airport Alternative as the Preferred Alternative was made by the City to comply with the National Environmental Policy Act (NEPA) regulations that state that the Final EIS shall identify the Preferred Alternative (23 CFR § 771.125 (a)(1)). This selection was based on consideration of the benefits of each alternative studied in the Draft EIS, public and agency comments on the Draft EIS, and City Council action under Resolution 08-261 identifying the Airport Alternative as the Project to be the focus of the Final EIS. The selection is described in Chapter 2 of the Final EIS. The Final EIS also includes additional information and analyses, as well as minor revisions to the Project that were made to address comments received from agencies and the public on the Draft EIS. The following paragraphs address comments regarding the above-referenced submittal:

Property acquisition will occur early in the construction process. In all cases, the City will be required to follow the requirements of the Federal Uniform Relocation Assistance and Real Property Acquisition Policies Act. As stated in the Final EIS, Section 4.4 Acquisitions, Displacements, and Relocations, Environmental Consequences and Mitigation:

A partial acquisition typically is either a narrow strip of land or a more substantial portion of a large parcel. It is assumed that for the properties that would be partially acquired, existing land uses would not change. For residential properties, if the proposed right-of-way line comes within 5 feet of a residential structure, it is considered a full acquisition. If the right-of-way line is

outside the 5 feet, it is considered a partial acquisition. For commercial properties, including situations where the commercial property could lose its function, full acquisition was considered.

Regarding other construction delays, the City is working closely with the Oahu Island Burial Council to develop the most effective ways to find, identify, protect, or relocate iwi kupuna (Hawaiian burials) if they are found well in advance of Project construction. Similar steps are being taken to minimize other risks.

To answer your second question, Section 6.6 of the Final EIS discusses risks and uncertainties associated with the financial analysis presented in Chapter 6. Changes in project schedule are one source of risk that is discussed. Chapter 6 also discusses other options for raising revenue should it be necessary to find additional funds. In addition to construction contingency, to minimize the risk of construction delays, the City will require contractors to pay liquidated damages if they cannot meet contract schedules. Furthermore, on a project of this size, the contractor's best incentive to complete work on time or even ahead of schedule is that they can generally make a higher profit if they do so.

The FTA and DTS appreciate your interest in the Project. The Final EIS has been issued in conjunction with the distribution of this letter. You may view the Final EIS on the Project website at www.honolulutransit.org. You may request a DVD of the Final EIS and additional content through the "Contact Us" tab on the website or by calling the Project hotline at 566-2299. Issuance of the Record of Decision under NEPA and acceptance of the Final EIS by the Governor of the State of Hawaii are the next anticipated actions and will conclude the environmental review process for this Project.

Very truly yours,

WAYNE Y. YOSHIOKA
Director
