Subject: Honolulu High-Capacity Transit Project - Supplemental Information
Attachments: Site 25 Aolele Ditch - revised.pdf; Site 31 Panakauahi Gulch revised.pdf

Hi Susan,

We appreciate your time reviewing the stack of items that we have sent to you. As Lawrence mentioned Tuesday in his email, our engineering team has been finishing up work on avoiding two resources, Aolele Ditch and Panakauahi Gulch. They have completed preliminary design drawings that allow for avoidance of the two resources. The project will be incorporating the avoidance design shown in the attached drawings.

If we can provide any additional information to assist in your review, please don't hesitate to ask. If you have availability in the next few weeks, we would like to provide revised EIS text and discuss it with you.

Amy
