Aloha no e Shad and Hina,

Okay, got you guys down in the "hiki no" column. I'll wait to hear from the others.

Mahalo nui,
Kehau

Aloha no kakou,

As we discussed at the last OIBC meeting, we're looking at stepping things up on the rail project and having some additional meetings,

especially to address the mitigation plans and burial treatment plans that might be included in the MOA/PA for the project.

Attached are draft emails (and docs) from Kaleo Patterson who's helping to guide the project regarding cultural and environmental issues. He's requesting our input on these.

Faith is proposing below that we meet next Wed at 9:00 to discuss the drafts.

Task Force members, would this day/time work for you folks? If you can't make it, would you please suggest another day/time?

In the hope that the day/time will work for us, I reserved a room here. It's a much smaller one than the last, but it can fit eight folks comfortably (and more if we bring in a few chairs and squish at the table). Sorry, that's the only one that was available.

I'll wait to hear back.

Mahalo nui loa,
Kehau

Hi Kehau –

An update to Kaleo's earlier email message. Would it be possible for us to meet with the OIBC Task Force on Wednesday, May 27th? Cultural Surveys and PB will be available any time that day. Maybe a 9:00 a.m. start? I was thinking that if we could have about 1.5 to 2 hours for this meeting we would be able to more fully discuss the work flow process/outline that would be reflected in the burial treatment plans and mitigation plans.

Also, if it is not too late, I ask that you hold off on sharing the draft programmatic agreement that Kaleo sent to you. We only recently received the PA for review and the copy that was sent does not reflect the City's comments.

Thanks for your help.

Faith

Aloha Kehaunani,

Thank you for keeping the work before us. Can you propose some dates when we can meet next week to go over some of the items, listed in the attached draft PA which is a part of the proposed MOA.

We are open to any suggestions you have now, and will be working on this draft over the next week.

The attached draft is very basic, we will be expanding points with more tech and process information, and re-writing sections. Please suggest new items for us to work on.

Here are other things we are working on:

Burial Plan Process

Rebury in Place response

Redesign column placement, or station process

Redesign decision making process

Internal Redesign Process

Having two or three burial plans...any suggestions on what these would look like and cover

Cultural and Lineal Families consultations

Iwi Kupuna - full 20 mile, cultural landscape integration approach

What are other things the City can include in the MOA/PA that will require 100% compliance, and best practices commitment, to avoiding and mitigating impacts, improve the process, avoid the problems that have been encountered in the past, and build community!

We are committed to working with you and your committee on these things, perhaps we can begin with one or two working meetings next week. Awaiting your reply. Mahalo!
