Subject: RE: Honolulu High-Capacity Transit Corridor Project

A couple of members of the -30 team have volunteered to look into the matter for purposes of ascertaining probable impacts associated with the selected site/activity and prepare a brief report that can be used to address the issue in the context of the record of decision.

Subject: RE: Honolulu High-Capacity Transit Corridor Project

This specific site is not identified or discussed in the environmental document. The documents only address this topic in the following text:

" Construction staging areas would be needed throughout the project area to provide adequate space for construction equipment, construction materials, materials stockpiling and transfer, parking, and other construction-related activities. While future park-and-ride lots and the maintenance and storage facility have been identified as potential staging areas, additional locations would be needed. It would be the responsibility of the contractor to obtain these additional locations."

FYI – Can we quickly reference the FEIS and determine if the site noted in the attached letter is identified in the environmental document? Thanks!

Leslie
