Ray,

We'll arrange for a driver and an engineer to take your group around. But it would help if you can narrow down the areas of interests after viewing the alignment map. Viewing all alignment options could be tedious and confusing.

Subject: Tour of study area

Hi Toru,

I think it would be a good idea for Leslie and me to refresh our memories from 2001 and get a quick tour of the study area. Also, Donna has not been out there. Is it possible to have a tour, next week, with one of your staff and a member of the consulting team. It seems that we are available either Wednesday morning or Thursday afternoon.

Thanks,

Ray

Ray:

Below are some maps showing portions of the project, you might want to see. Toru says you and LR have seen the corridor. He can have you look at a specific area that is shown below. Some of the roads do not yet exist. We can discuss.
