Subject: RE: Sole source aquifer -- Honolulu Rail Project

Hi John, Thanks for your reply. No, the DEIS doesn't contain any additional information specific to groundwater; the Draft Ground Water Impact Assessment is more detailed than the DEIS. We would like comments on the GWIA as soon as possible. We are in the process of replying to all the comments on the DEIS and will have to include any mitigation measures developed from your review of the impacts on the SOBA in the FEIS. Would you be able to have something to us next week? Is there anything else we need to provide to you? If you would like to see the DEIS or get any other updates on the project, check out www.Honolulutransit.org --the project website.

Thank you
Jan

Jan -

Thanks for your email. I had been in contact with Faith Miyamoto, a few months ago, but I was not aware of a specific deadline for comments. EPA has not yet commented on the project under it's SDWA 1424(e) authority. Can you clarify whether the DEIS contained any additional information on groundwater issues beyond what was in the July 1, 2008 "Draft Ground Water Impact Assessment, Honolulu High-Capacity Transit Corridor Project" prepared by the City and County of Honolulu?

Thanks.

Sole source aquifer -- Honolulu
Rail Project

Hi John,
I was wondering about the Sole Source Aquifer Report - Water Quality Impact Assessment for the Honolulu High Capacity Transit Project. I

AR00139939

work for Parsons Brinckerhoff and we are under contract with the City and County of Honolulu Department of Transportation Services. I believe the report was sent to EPA a few months ago, but have not seen a response to it. The comment period on the DEIS just ended and we need to incorporate any concerns as they relate to the Southern Oahu Basal Aquifer. Could you please let me know if your office made comments so I can track them down?

Thanks!
