**Subject:** Honolulu Rapid Transit Project - farmland information

Hi Tony, I am sorry for the slight delay in getting this information to you. I just wanted to make sure that we re-calculated the areas correctly for you evaluation of farmland impacts from this project. The impacts to farmlands from the alignment are the same for each of the project build alternatives as follows

Prime= 80 acres  
Unique = 0 acres  
Statewide Important = 8 acres

Of the 88 acres, 70 acres are actively farmed.

Attached is the GIS shapefile. The projection is NAD\_1983\_StatePlane\_Hawaii\_3\_FIPS\_5103\_Feet

Please let me know if you need anything else.

Amy
