Subject: Bike-Transit Primer

Chris & Mark,

Attached please find the Bicycle-Transit Integration Primer discussed earlier, prepared as part of the Oahu Bike Plan. It addresses and makes recommendations on general bike accessibility issues at transit stations, and includes schematic drawings of how bike parking could be handled at the street mezzanine levels.

Hope it is useful to the station designers.

Chris: This document will probably be incorporated as an appendix to upcoming Work Product 2.2.2.

Regards,

Gail U. Renard
