CONFIDENTIAL

Toru, I have been asked to meet with Nestor Garcia at his office on March 27 to discuss the utility's role in the transit project. I'm quite comfortable with where we are and how we got there and have no hesitation in sharing that information (verbal) with him. It should be reassuring for him to learn independent of the Administration that you guys are doing just what you should be doing. Two major areas of interest as I see it related to HECO:

- 1. You are keeping us informed of your estimates for timing and amount of electricity demand so that we can include these figures in our load forecasts (which we have done).**
- 2. We both recognize that early identification of existing utility relocation work is important and have taken steps to include HECO people in that effort.**

I have no reason to believe this meeting is anything other than his interest in making sure all the bases have been touched. Just wanted you to be aware that I'd been contacted.
