Subject: Honolulu High-Capacity Transit Corridor Project

Hi Ray and Ted –

Hope you both had a great Labor Day weekend.

In case you do not already know, PB Americas, Inc. has been selected as the General Engineering Consultant for the transit project and the contract with PB was executed on August 24, 2007.

Jim Van Epps is the PB Project Manager, with Steve Hogan as the Planning Manager, responsible for Environmental Planning, Transportation Planning and Financial Planning. Lawrence Spurgeon will be leading the Environmental Planning effort.

Susan Robbins is the Environmental Manager from InfraConsult who will be responsible for overseeing (?) the preparation of the EIS.

In light of the commencement of the GEC contract, I want to confirm who will be FTA's primary point of contact for the EIS effort. Do we address submittals to Region IX with cc's to HQ – Ron Fisher, Jim Barr, etc.? Should all questions regarding the EIS be directed to both of you, with you consulting with HQ if required? My understanding is the Jim Barr is the HQ person who will be working with us on the EIS process. What is Joe Ossi's role?

Here we go again.
