Phyllis,

Aloha. Hope everything is going well with you.

I've attached a document from the FTA archives which may be useful and of some assistance as you work through the FMP. This document outlines the FTA Guidelines for a Bus Fleet Management Plan for New Starts projects. Your bus fleet of course is not considered a New Starts, but at least the document provides an outline for what FTA is looking for in a FMP.

Please review and hopefully it will be of some help. Should there be any questions don't hesitate to contact me, I will be glad to assist in any way I can. If not, just keep it as a reference or toss it.

Bob
