Quite a document!

I am still concerned with the language calling for the offerors to establish the DBE goal for the work. The DOT guidance issued in the wake of the Western States decision does not suggest such an approach. At a minimum it appears to be a variation on the DBE rule that would need to be approved by DOT.

The technical memorandum on DB and Phase 1 is complete but for the DBE issue. In order to address it I need to know how the City responded to the FY 2006 options for either goal setting or doing a disparity type of analysis. It may be desirable to separate out the DBE issues. Regardless, I plan to give you the draft for 2.3.5 on Monday in advance of our meeting with the PMOC.
