Subject: Congestion relief ideas from Disney

May I ask both of you whether there is a way of contracting with Disney to address Oahu's congestion issues.

I would like to claim this idea for my own, but Disney came up in a discussion with a local artist I met. Disney knows how to work with crowds. They also know how to operate a monorail and people mover system. Disney also knows how to think creatively, and they make money too. If the City could hire Disney, we may get a different perspective on how to efficiently move people.
