RE: PARKING CONCERNS REGARDING THE EAST KAPOLEI TERMINUS OF THE MINIMUM OPERABLE SEGMENT OF THE HONOLULU-HIGH CAPACITY TRANSIT PROJECT

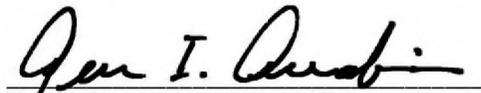

Thank you for providing us with an opportunity to provide comments during the scoping phase of the Environmental Impact Statement (EIS) for the Minimum Operable Segment (MOS) of the Honolulu-High Capacity Transit Project. The lands near the transit stops in the vicinity of the East Kapolei terminus of the project's MOS are in various stages of planning, development and construction. As landowners, developers and a regulatory agency (HCDA) located near the East Kapolei terminus of the MOS, we have worked collaboratively to address infrastructure and development issues within this region and to accommodate the proposed transit corridor and stations.

However, because the East Kapolei transit stations will be the western terminus of the MOS, we are concerned that without dedicated accommodations for transit-related automobile parking in the vicinity of the planned East Kapolei transit stations, on-and off-street parking within the future developments may become "de facto" park-and-ride facilities.

A potential solution to this problem could include extending the transit corridor makai of its existing terminus near the KROC Center to properties where there is land available for a park-and-ride facility located in HCDA-regulated lands in Kalaeloa, about 6,500 feet to the south of the current terminus, where there is 200+ acres available to the City.

Thank you for the opportunity to provide comments during the EIS scoping period. We look forward to working with you on this exciting project.

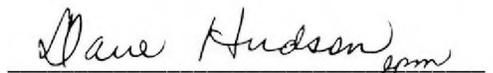

Sincerely,
