Subject: Ala Wai Canal Project - Oahu Rapid Transit Line and Ala Wai Canal
Attachments: AlaWaiInfoPaper.pdf

Mr. Hamayasu-

I was given your name by Marvin Fukagawa (DPP) and Laverne Higa (DFM) as the person to contact regarding the Rapid Transit.

In his Wash, DC office Congressman Abercrombie mentioned to the Corps' Honolulu District Commander, LTC Chuck Klinge, that the Corps' Ala Wai Canal Project (flood control and ecosystem restoration in and around the Canal) needs to consider the route of the City's Rapid Transit Line. I am the Project Manager of the Ala Wai Canal Project and am trying to find out what the City's intentions are such that we can coordinate our activities.

Is the City considering a Rapid Transit route on or adjacent to the Ala Wai Canal? If so, I would like to meet with you and to gain information about the Transit Project.

The Ala Wai Canal Project may involve the deepening of the canal, construction of levees/walls along the canal, modifications/reconstruction of the bridges (McCully, Kalaukua, and Ala Moana Blvd), and widening of the canal near the Convention Center. The Project also includes upstream restoration and flood control features. I have attached an information paper providing you with general info on the Project.

I look forward to hearing from you.

Thanks. Derek
