Ray:

I talked to Jim and he has promised to look at Slater's letter and Honolulu's response tomorrow and to comment on the adequacy of the response, suggest areas where additional response is warranted, if any, and even to suggest what the response should say, generally. His impression is that the Honolulu response is not as bad as you think it is, but he will take a look.

I agreed to address his concern that the P&N statement in the NOI says in the first sentence that the purpose is to build a fixed guideway on exclusive ROW. I have attempted to address his concern in the attached revision of the first paragraph of the P&N section.

Here is the latest NOI. Please let me know if you think we should hold this up to assure that DTS responds to all the planning comments. If you think we should move forward I need to know as soon as possible so we can maintain the scoping dates.

Thank you,

Ray

Hi Ray and Ted –

Sorry I missed your call this week. Attached is the draft Notice of Intent that we formally transmitted to Leslie Rogers today. We also sent a Notification of Initiation of the Environmental Review Process.

Let me know if and when we can discuss the other requirements.
