Dear Directors,

I received the following email and a call from Michelle Matson regarding the upcoming City Council meeting (Dec 7, 2006) on selection of the preferred alternative for a fixed rail alternative.

The video below actually has a simulation of the fixed rail stopping on the Topa Tower side of Nimitz Highway fronting Aloha Tower Marketplace.

Michelle is quite concerned that a fixed rail fronting Aloha Tower Marketplace will detract from the open park/space plan proposed by Ken Hughes and will discourage our efforts to create an inviting downtown waterfront.

Michelle has spoken to Ken Hughes about it, I received a call from Jim Stubenberg confirming that Ken has looked at this and is against it.

Would you like to discuss this at our meeting on Wednesday, 11/29/06? Director Quintal will be unable to attend the meeting.

Thanks, Sandy
