**Subject:** Re: HOT not FTA Eligible

Toru,

This is being superseded "as we speak". In fact October 2006 APTA testimony to FTA is strongly in favor of HOT developments and the T part in particular (tolls for low occupancy vehicles), because they recognize it a way to collect revenue and cross-subsidize express bus and other public transit operations.

Would you please clarify for me the EIS timeline?

Thank you,  
Panos
