**Subject:** RE: Alternative Mass Transit Systems

Dear Professor:

Rest assured we'll look at every available transit system before proceeding with ours.

Aloha,

Mufi

Subject: Alternative Mass Transit Systems

Dear Mayor Hanneman:

I am a resident of Hilo visiting Vienna, Austria. I am very impressed with the integrated public transit system here that seems to move effortlessly and efficiently serving the city's population of 1.2 million population. Vienna's electric tram seems well suited to Honolulu. Such a system could be installed along existing freeways/highways without much additional highway construction. It is worth taking a look at this system before making a decision for Honolulu.
