Subject: Honolulu High-Capacity Transit Corridor Project

Hi Connell –

As you are aware, the Department of Transportation Services is preparing an alternatives analysis of transportation improvements for the corridor from the University of Hawaii – Manoa to Kapolei. One of the issues that the alternatives analysis is evaluating is Environmental Justice. We would like to discuss our proposed methodology to address Environmental Justice with the appropriate person at EPA. Would that person be you? Also, should we be coordinating with the Pacific Islands Contact Office in Honolulu?

Thanks in advance for your help.
