Aloha Venkat,

Thanks for the info. I will try to attend the AM session when Walter gives his talk. I am a little concerned about the Korean manufacture getting excited if we signal interests. Technology selection is years away for us at this point. I will introduce myself to Walter.

Toru

Importance: High

Toru,

I am pleased to know that there is continued interest in low speed maglev (Chubu HSST type) for Honolulu. There is a meeting between USDOT representatives (including FTA) and South Korean counterparts next week in Honolulu. I have attached the program for Monday, January 9 when there are presentations by FTA and the Korean representatives on low speed maglev. The Koreans have a system very similar to the Chubu HSST.

If interested, you are welcome to attend any or all of the sessions. I have your work telephone numbers as 808 527 6978 and 808 527 6882. If you attend, please say hello to Walt on arrival at the meeting venue.
