

## Youth Xchange 2012 Sponsored Category:

Enter a video submission to the Honolulu Rail Transit Project's video category and tell us how your future rail transit system will help our island's mobility and benefit future generations. PSA (public service announcement) video entries can either be a 30-second, one-minute or two-minute submission.

### Background:

Each year, O'ahu's population increases and traffic gets worse as more cars are added to our roadways. Sitting in traffic leaves less time for more important activities. Rail transit, an affordable, reliable transportation alternative, will give future generations more time to do what they want to do.

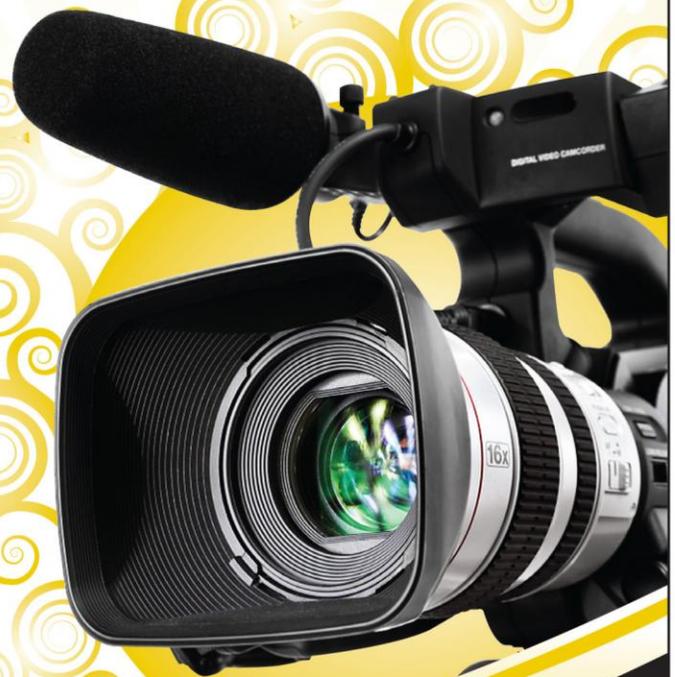

### About the Project:

The Honolulu rail transit project is a 20-mile elevated rail system connecting the Second City of Kapolei to Honolulu. It features 21 stations on the route from East Kapolei, going through Honolulu International Airport and Downtown Honolulu and ending at Ala Moana Center. By 2030, it's estimated that approximately 116,000 weekday commuters will be using rail transit—taking about 40,000 cars off our roadways.

It will increase mobility and provide island residents another way to commute to work or school and for other activities. It's a green alternative to driving that will reduce pollution and reduce our island's carbon footprint.
