HART AWARDS PASSENGER WI-FI CONTRACT

(HONOLULU)- The Honolulu Authority for Rapid Transportation (HART) has awarded Icomera US, Inc. the passenger Wi-Fi system contract for the Honolulu rail project.

“One of the most frequently asked questions we get is, ‘Will there be Wi-Fi on the trains?’”, said HART Executive Director and CEO Andrew Robbins. “We are always happy to reply ‘Yes, there will be Wi-Fi onboard’, and we are happy that Icomera will be providing the Wi-Fi system for HART.”

Four companies submitted bids in response to HART’s solicitation for the Passenger Wi-Fi System Contract. Icomera was the low bidder with a bid of \$1,219,858.

Icomera, a subsidiary of ENGIE Solutions, is the world’s leading provider of mobile internet connectivity and application platforms for public transport, serving millions of Wi-Fi passengers and tens of thousands of buses, coaches, trains and trams worldwide on a daily basis. Its US headquarters is in Bethesda, Maryland.
