**Subject:** Honolulu Proposed Rail System

Hi Faith,

Hope you had a nice Thanksgiving holiday.

There is one more mitigation that the City might consider and that may address our concerns regarding the sight lines and noise. We recommend locating the rail system at the street level along Haleakuwila Street instead of an proposed elevated rail system. Let us know if this mitigation measure is feasible and if not, please provide us the reasons why it concept was eliminated from further consideration.

Thank you, Faith.
