Subject: FD Roadmap

Harvey - I am trying to get organized and I wanted to check on something regarding the status of geotechnical efforts. Here is what have:

- WOFH - We have the Geotech Basline Report (GBR), Geotech Data Report (GDR), and contractor's exploration and test shaft plans. (Correct)
- KHG - We have the GBR but not the GDR. (Will provide you with a combined DVD of the GBR & GDR next week)
- MSF - We do not have the GDR. I do not believe a GBR was to be utilized for this contract, but please confirm. (No GBR prepared, will provide you with DVDs of the GDR next week)
- Airport Guideway - We do not have the GDR or GBR. However, we assume if a GBR will utilized, it will be prepared at a later date. (Correct and since this is a final design contract, no specific GBR is planned except the final designer will need to perform a boring a each pier location during the design effort)
- City Center Guideway - We do not have the GDR or GBR. However, we assume if a GBR will utilized, it will be prepared at a later date. (Correct and since this is a final design contract, no specific GBR is planned except the final designer will need to perform a boring a each pier location during the design effort)

I apologize if some of the "missing" information was included on one of the CDs that was provided, but I cannot locate the information. It should have been identified on the FD Roadmap as well, but is not. We will need to add it. (Under 2.17 will re-title to Geotechnical reports and show all five contracts – four guideway + MSF)

It is a requirement to have completed sufficient PE with regard to the geotech aspects of the project to advance to FD. I believe this work has been done, but we need to review the documentation.

Can you please check on the status of that information and let me know where it stands?

Thanks
Tim
