Did we really receive a few requests or just one? This reporter will be sure to ask a follow-up question of how many requests we got since to him it would be an indication that folks have a problem with the project.

How about this? We need to respond to Paul in the AM.

The Federal Transit Administration (FTA) received a few requests for additional time to review the Final Environmental Impact Statement (FEIS) beyond the 30-day review period established in the Federal Register Notice announcing the availability of the FEIS. To assist persons interested in commenting on the document, FTA extended by the comment period by 20 days, until August 16.
