Liz, Jesse asked that I respond to your question. The project will physically incorporate property from a parcel that contains two buildings that are contributing elements to the Chinatown Historic District.

Jesse,

If the project will physically incorporate a portion of the property of the contributing buildings, then we should continue with the direct use analysis.

If we were not physically incorporating property of the contributing buildings into the project, then we would have requested that a constructive use analysis be performed for the Chinatown Historic District.

Please confirm that the first situation is the case.

Thank you,

Liz

Elizabeth,

In our last phone call regarding Section 4(f) impacts on the Chinatown Historic District, Chris suggested that we could use a "no use" analysis for the Chinatown historic district. At the time, you were told that there was no use of historic property in the Chinatown historic district. However, our planner followed up and there are contributing buildings on the parking lot property. The other reason we used the current Section 4(f) approach was based on the adverse effects related to design, feeling, and association.

Given this information, do you still want us to change our direct use analysis to a no use analysis in the EIS and NPS response letter?

Sincerely,
Jesse K. Souki
