Subject: RE: Request for Navy/Air Force Land To Support Rail

Duane-
We have not submitted an official request for land (letter or document) to the Navy or Air Force. We can not formally request property until we receive the Record of Decision. We have requested several easements around the Ewa Drum Site. In Appendix C of the Final EIS, all potential right-of-way impacts are noted exclusive of most easements.

Once we receive the ROD we will begin acquiring property for the project. It would be helpful to understand how long the process would take to secure the property we may require from either the Navy or Air Force. Once I understanding the required processing time, I will then be able to provide you with anticipated schedule.

Regards,
Laura

Subject: Request for Navy/Air Force Land To Support Rail

Ms. Ray,

In the Navy's comments on the DEIS and FEIS, we have commented that we need an official request from the City to begin the process to transfer land to support the rail. The City's response letters state that a map was provided. I'm sorry to report that no one recalls this map or seeing an official letter.

Was an official request for land (letter or document) submitted to the Navy or Air Force? If yes, could you provide a copy to Ms. Wery and I. If not, when do you anticipate sending out an official request for Navy/Air Force land? Please send Ms. Wery and I a copy of the request when issued.

Thanks,
Duane
