Page S-10, "Cost and Financial Analysis, use YOE consistently and the capital cost should be \$5.3B YOE.

Pages 2-22, 2nd column, 2nd paragraph, 4-35 and 4-37, airport impacts are insufficiently described. As discussed in FAA/HDOT meeting, October 19, 2009, please present a complete description of impacts with diagram or drawing and a discussion of mitigations. Also, as suggested in an e-mail to Toru on October 23, 2009, please development a plan "b" that does not impact airport operations.

Pages 2-45, 3-59 and 4-196, there is inconsistency in describing how and where the project will open. The descriptions say "portions", "sections" and "phases" respectively. FTA is unclear about the plans for opening, public operations and temporary traffic impacts and the progression of openings that are planned.

Page 2-44, update the method of contracting since the acquisition method is known. This is important information for various resource agencies.

Page 3-59. identify the plan to accommodate the use of phased openings as a mitigation.

Please review these comments and, if they look ok, add them to the other FTA comments being sent to DTS. Thanks.
