Tim, I just received this. It sure sounds like the first letter they were going to give to us early last week because it is still restricting the third activity ("initial design activities preliminary to various interim design submittals"). I would like to call you shortly to figure out what level of "sufficient detail" is needed beyond what you provided to let us start on the third category.

Mr. Hamayasu,

Attached is an advance copy of the subject letter.

Thanks,
Elba
