Subject: NTP No.1A

Leslie,

I would appreciate if you can call me about our Feb 8 note to you informing our intent to issue NTP 1A on Feb 22. Obviously, we did not. I asked Peter if we can have his verbal response when I visited him last week because we were at the end of the NTP 1 period as of March 1. Peter asked me to wait because he was not aware of the issue and assured me that we would hear soon. I pushed and told him that we would in a claim situation starting March 1. Peter said he understood that.

I did not hear from Peter early this week so I called Susan Borinsky and learned that the letter was sent to you for signature. I still haven't heard from you.

Kiewit has sent us a notice of change (RFC) regarding the next NTP.

Leslie, I have to issue NTP 1A and I intend to do that on Monday, March 8, to minimize our risk of being in a claim. Confidentially (because we don't want Kiewit to learn this), our engineers who had been on the other side estimate the potential claim value could be between \$100k to 200k per week.

I would appreciate your reaction.

Toru
