All,

After what we thought was a final consultation meeting last Friday with the larger consultation group, we were copied on this email from Betsy Merritt to ACHP. They are coordinating with the other preservation groups to develop a further set of comments. We had hoped to move onto a final discussion with the signatories as soon as we can confirm that with ACHP and set that up. We'll have to see what Betsy sends and determine our next steps then.

Ted

Faith,

I just wanted to let you know that I spent the weekend and yesterday working on a set of comments and coordinating with the other preservation partners to get their thoughts as well.

However, I'm afraid I've got meetings out of the office all afternoon, so I won't be able to send the comments over until this evening.

Hi Betsy –

Just a follow-up to our earlier discussion today regarding the Section 106 PA.

Section IV. Design Standards

As I related, we have completed the neighborhood design workshops for several of the groupings (Waipahu, Kapolei, and Leeward Community College). The final design workshop for the Pearlridge Station will be held on December 2. It is anticipated that the largest grouping will consist of at most four stations.

The PE plans are almost complete. Once completed, the PE plans will be provided to the signatories and consulting parties for review and comment. Also, the PA provides that the plans developed for stations within the boundaries of or directly adjacent to listed or eligible historic properties will also be provided during the Final Design phase.

Section IX. Measures to Address Reasonably Foreseeable Indirect and Cumulative Effects Caused by the Project

We can say with confidence that the baseline demolition information can be completed before the first annual meeting of the

consulting parties. We intend to start work on getting the baseline information right away and will provide the information to the consulting parties as soon as possible.

Hope this helps.
