Hi Debbie:

Can he give us something like a status report on the light rail or fixed rail system? I guess for me I really don't know much except that the Leg is proposing to raise our GE tax will be to pay it. There will probably be questions, so if he is okay in answering them then I think he will be fine.

Ses,

Toru Hamayasu from the Department of Transportation Services will be available at your May 9th meeting to discuss or respond to questions about the future rail project in general, however he does not intend to do a formal presentation. Is this okay?

Thanks, Debbie
