Thanks, Liz. Sorry about the confusion that was caused; I hope it doesn't set us back. Carl

Subject: Honolulu

You may have already heard from Ed, Region 9 would like to have a teleconference tomorrow to discuss the status of the Honolulu project. I think it is a good idea just so we catch up and get on the same page. The SHPO called Region 9 looking to speak with Leslie Rogers and ended up talking to Ted. He received my email before I left last Thursday, but was not aware of our concerns that the CLG may be broader than the scope of the PA and that we encouraged the City to handle that as a local issue. The SHPO canceled a meeting schedule with the City after the call with Ted.

I have called the SHPO and left a message requesting that she call me back. I called Faith to let the City know that I am trying to contact the SHPO. The other two concerns that the SHPO has are items that I think can be discussed within the context of the PA. The SHPO may not agree to meet with the City until we have a meeting of the signatories and invited signatories. Because their office is under high risk status, they were not trusting of the City with this step.

Also, Faith indicated that the Project Manager for the Honolulu High Capacity Transit project is flying to DC for a meeting today or tomorrow.

Liz
