Subject: RE: Honolulu High-Capacity Transit Project - Supplemental Information

Hi Amy,

I'm stretched a bit thin right now since I have limited time in the office before I begin my work travel for the following two weeks, but I wanted to be sure to touch base with you to let you know I received your voicemail message from 6/4 inquiring about further clarification or a better understanding of what the Corps is looking for in the subject submittal(s). The May 29th comment letter that we transmitted to the City and County should speak for itself; although I thought I would refurnish a copy of the 1987 wetlands Data Sheet to you all. This is the same data sheet we passed out during our last team meeting, along with the diagrams depicting the Corps' regulatory jurisdiction.

I'm still interested in a conference call with FTA and PB to discuss the overall project schedule. I think it would be fruitful to have all of us talking together, as the Corps wants to ensure we correctly understand the City and County's schedule vs. FTA's schedule (if not one in the same) for purposes of NEPA compliance and our agency's adoption (Corps NOI to adopt, Corps ROD, etc). Of course, any DA authorizations would stem from there and as you've acknowledged, there are a number of precursors to any DA authorization (e.g., 401 WQC, if applicable, CZM, ESA Sect 7, Section 106, etc.). Thanks in advance for your help in setting up this call.

As I mentioned, I will be traveling 13-26 Jun on the Mainland and unavailable via email. If there are pressing questions or issues that arise in my absence, you can contact George Young. Otherwise, perhaps we can try to connect during the last week of June or early part of July.

Thanks,
Susan
