Subject: Honoulu Alternative Alignments

Cathy/Ray - I spoke to Harvey. PB will begin uploading plans, estimate, and basis of estimate information on the ProjectSolve site by COB today. Once we see how extensive the information is, we can provide you with a target date for submission of our assesment. Tim Morris and I will be in Minneapolis on Tue and Wed of next week, so my time is limited until Thursday. Keith Konradi (my track engineer) will be able to start thre review late Monday or first thing Tuesday.

I do expect, and Harvey has confirmed, that the level of design development will be less than for other portions of the alignment. The question we need to answer is whether it is sufficently developed to support the cost estimates. I am OK with less design development, but we need to ensure that the City has simply not gone through the motions to satisfy a requirement of studying alternatives.

Thanks,
Tim
