Dear Lawrence:

Thank you for your call. I would be happy to do a workshop with you regarding expectations and project understanding for the determination of eligibility. Initially I had passed your email on to our administrative team to see if they would also be interested in participating. Based on your message, however, it seems that this particular workshop would focus on the architectural resources (correct me otherwise).

As for scheduling the week of the 15th, it is a little tricky I must say, but I might suggest that I do have to be in town for another meeting from 9 to 10 on Friday the 19th, so I would be free after that. If that doesn't work, we can talk other dates. For instance, the 17th I have a meeting here from 10-11 but would be free after that. Thank you so much for the offer. Will other consulting parties, such as Historic Hawai'i Foundation, be participating?

Best regards,
Astrid

Subject Transit Project

Aloha Astrid,

As you have probably seen, or Draft EIS is being released this month. We have included the SHPD correspondence to date. Your office should receive the EIS next week. Thank you for your time and effort to date on the project.

I would like to make our process for proposing Determination of Effect and mitigation as streamlined as possible. I was wondering what you would think of having a workshop, either 1/2 or full day where we could bring in our preservation people and design engineers and architects and meet with you and any of your staff to work through expectations and project understanding.

I was looking at the week of December 15 (any day) as a good time for us based on our overall project schedule. We should

AR00142441

also be able to share any comments that we had received on historic resources from the public hearings. We would then take the notes from the workshop and prepare the determination of effects report and draft a MoA. We're happy either to come see you, or host you at our offices.

Let me know if you think this might work, and how we could fit into your schedule.

Lawrence
