Subject: comments on draft FEIS

Faith,

Attached are some preliminary comments on the draft FEIS, including the 4(f) section. Please be informed that these are not FTA's final comments. We continue to review the documents, but in the interest of expediting your response to comments we are providing this information to you at this time. FTA will continue our review and attempt to conclude it as quickly as possible. However, I cannot give you a date when a final set of comments will be transmitted, but rest assured FTA is working to expedite our review.

Attached is a set of comments word file, plus a marked up section of the document in a PDF file. Please note that one of the comments includes a revised paragraph that should be inserted in the area noted in the marked up text.

FTA also requests that you do a quality control review of the draft FEIS materials that were sent to FTA, particularly the appendices. Appendix A on the disc has multiples errors and lacked an important response letter to Cliff Slater. We'd like to be assured that no other important elements are missing before we complete our review.

Also please review and respond to Jim Barr's related email on outstanding 106/4(f) issues that need to be addressed

I will be in transit Monday but likely see you on Tuesday in Honolulu.

Ted Matley
