Subject: Honolulu High-Capacity Transit Corridor Project (HHCTCP)

Good morning, Roger. We need to prepare a Bus Fleet Management Plan as one of FTA's requirement for the HHCTCP. We request historical annual data on unscheduled bus maintenance: number of road calls by year; the reasons for the road calls; and how often during a year that the peak pull-out cannot be met due to scheduled and unscheduled maintenance. Ideally, the requested data would be for Fiscal Years 2003 to 2006 (4 years) and can be provided within the next couple of days.

We have OTS' current Maintenance G.O.P. as of 6/15/2007 on CD. My sole functioning brain cell seems to recall that OTS was planning to make some revisions. Please send me a CD of the updated Maintenance G.O.P. if it was revised since 6/15.

Thanks in advance for your assistance. If you have any questions regarding the requested maintenance data, please contact Mark Scheibe (PB Americas) at 768-6156 or email: Scheibe@pbworld.com.

Happy Holidays!

Phyllis
