Subject: RE: Honolulu Preservation of the forecasts - Part one

Mark:

- As mentioned in your previous email; I have not yet received the DVD (Preservation of the Forecasts for FEIS – Part One).
- I was trying to run the 2018 MOSJ model in my computer and could not run it. I noticed that some of the files are somehow corrupted. For example, ACCALL.BAT file in TRN\ACC directory is not a batch file; a bunch of data is in the file. Please verify all the input and batch files before you send them to me.

Thank you!

Nazrul,

I believe the City will be sending the DVD by FedEx today. I'll put it on the ftp site today when I get in, though it'll take quite a while to upload on my end. It's currently available on the project's ProjectSolve site, which Jim has accessed before.

Mark:

Have you sent the DVD? We issued a task order to our Preservation of Forecasts contractor and are waiting for the DVD. Please send it via FedEx. Also is it possible for you to upload the B05 model at your ftp site for now? I want to review that model sometime today.

Just to be sure: we got a total of six DVDs for the "preservation" task. Three have the travel forecasts (Part one, Part two, and Part three) while the other three have scope, service levels, costs, the draft EIS, and a collection of 11/2008 technical reports. We can't read the first of the three DVDs that convey the travel forecasts.

Thanks for your help.

We received three DVDs from you and one of them is somehow damaged; I can't read and copy files from that DVD. Please make another copy and send it to us. Thank you!

Damaged DVD – Preservation of the Forecasts for FEIS – Part One.
