

December 4, 2006

The Honorable Todd Apo
Honolulu City Council
Honolulu Hale
530 S. King St .
Honolulu, HI 96813

Dear Council Member Apo:

The Honolulu Japanese Chamber of Commerce shares the concerns of the general public and businesses that something must be done to alleviate the traffic concern in Honolulu. This congestion is expected to increase in future years as the population increases.

We urge that the Honolulu City Council take expeditious action to decide on the mode and alignment (route) of the transit system by year end so as not to delay this most important project.

We humbly ask that you select Guideway Fixed Rail System with an Improved Bus System as the mode of transportation. We further ask that you consider an alignment that goes from Kapolei to the University of Hawaii at Manoa with an eventual spur to Waikiki.

We realize that the decision that you are about to make is perhaps the most significant one during your council term, but it will be the most critical in improving the lifestyle of the people of Honolulu.

Thank you for your consideration.

Sincerely,

Wendy A. Abe
President
