Subject: RE: GSA Noise Analysis

When GSA sends you the information on their noise standard, please forward it to me. Also, it sounded as if there were updated drawings of the track at the location of the federal building. Could you send those to me or confirm that they are the same as the ones in the EIS appendices.

Thanks again!

Subject: GSA Noise Analysis

Hello Faith,

I hope that there was not too much trouble hearing me during the discussion today. We would probably like to have one of our noise experts take a look at the GSA materials and proposed mitigation measures. At the headquarters level, we have this issue with recording studios, medical facilities, and concert halls. We have not experienced this concern previously with court rooms.

It should not take long to get an assessment of their analysis.

Thanks,

Liz
