Aloha Ben,

Thank you for the inquiry. I appreciate your willingness to expedite the follow up action resulting from the March 17 meeting. We decided not to forward that information because of the pending decision of not pursuing the runway relocation. I understood that this information was to be relayed to you.

Toru

Aloha Toru,

As you may recall at the March 17, 2010 meeting, the FAA made a commitment to review an application for in pavement approach lighting system for Runway 4R. As mentioned at the meeting, we have no knowledge of this being done anywhere in the USA. The C&C consultant agreed to forward an application with additional information for our review. We agreed to review the application and report on our status in 2 weeks. It has now been 3 weeks and we have not received an application. Please advise on how you wish for us to proceed.
