**Subject:** Re: Inter-Island Wind Project and Honolulu Light Rail project [Request for Contact Info from CG/LA Infrastructure LLC]

J. Alex Shtogren (CG/LA Infrastructure LLC) .... FYI: .... as requested (pursuant to your search for "speakers" to participate in an upcoming "panel discussion" in Washington, D.C. on major energy savings and mass transit projects), ... the following background reference info are provided for your use and further handling:

1. Department of Accounting and General Services, Public Works Division (DAGS-PWD) staff are providing Department of Business, Economic Development and Tourism, Energy Division (DBEDT-Energy) staff with technical support (through execution and administration of a "subject matter expert" consultant services contract) which is needed for State development of a "Request for Proposals (RFP)" solicitation document to procure an "interested and qualified developer" that can "design-build (and possibly finance)" implementation of the proposed "DBEDT Inter-Island Undersea Cable" project; .... **[NOTE: This "DBEDT Inter-Island Undersea Cable" project will only involve the proposed installation of undersea power transmission cables between the islands of Molokai, Lanai, and Oahu .... with .... "power converter stations" on each end of the power transmission cables (as needed)].**
- Theodore Peck (808-587-3812) is the designated DBEDT State Energy Coordinator (he is responsible for overview management of "State Energy Plan" projects being implemented by State and County agencies in Hawaii);
  - Carolyn Shon (808-587-3810) is the DBEDT Energy Conservation Program Manager;
  - Joshua Strickler (808-587-3837) is the DBEDT-Energy staff directly responsible for overview coordination of the "DBEDT Inter-Island Cable" project.... and .... "Wind Farm" projects by private-developers on the islands of Molokai and Lanai .... with .... hook-up(s) into the Hawaiian Electric Company (HECO) power grid infrastructure on the island of Oahu.
  - DAGS-PWD staff are also working with Faith Miyamoto (808-768-8350), City and County of Honolulu (CCH) staff, .... on negotiations for long-term easements through the Aloha Stadium property (State-controlled parcels) that are needed for the proposed light rail alignment of the "Honolulu High Capacity Transit Corridor (HHCTC)" project .... and .... development of a CCH light rail transit station with bus turn-around terminal on a portion of the Aloha Stadium property.

Please call me (808-586-0500) if there are any other questions on this matter; .... Ralph Morita, DAGS-PWD, Planning Branch, Chief
